Subject: Question on FOIA regarding Freon in groundwater wells - Northrop Grumman Navy plume
Attachments: FOIA 008714-Freon-description.docx

Good morning Jason. I was asked to prepare a brief response to the attached FOIA request from Mr. Mark Miller of Hollingsworth LLP. He is asking for information on the presence of Freon 113 (1,1,2-Trichloro-1,2,2-trifluoroethane) in several wells from January 1, 2012 to Present. When I did a search of my on-line files, the only document I found which mentioned this constituent was DEC's Proposed Amended ROD (May 2019). I would be interested in responding to Mr Miller regarding where he can locate the requested information. Would it be ok for him to reach out to NYSDEC as the project lead, or perhaps is there a database which we can refer him to?

Thanks,
Carol
